

CHOOSE LONG-TERM CARE THAT SPEAKS TO YOU

Do you have a loved one who needs care at all hours of the day and whom you worry about constantly?

Are you considering the option of a long-term care home to meet those complex needs?

Language is an essential element for safety and quality of health care.

Often, as people age their ability to speak a second language deteriorates.

Not being able to communicate concerns, answer questions clearly and understand treatment options can be frustrating and even dangerous — leading to misdiagnosis or causing patients to act out.

Identifying yourself as francophone and asking to receive your health care services in French is a question of health.

Fortunately, French-language long-term care is available in the GTA at Pavillon Omer Deslauriers at Bendale Acres.

FOR MORE INFORMATION, talk to your doctor or call Bendale Acres at 416-397-7000.

TO FILL OUT AN APPLICATION FOR ADMISSION, contact your local Community Care Access Centre at 310-CCAC.
